

Experience Music by the Roomful.

For the ultimate in multi-room
music solutions, choose CasaTunes.

CasaTunes®
music by the roomful

Music. It can brighten your mood, make your day, and even transport you back to a favorite time or place. And now, thanks to CasaTunes, your favorite music moves with you – wherever you go in your house – for the full audio experience.

The single solution for multiple musical tastes, CasaTunes brings audio harmony to your household. Listen to the same music throughout your home, or play a different song in every room. Regardless of whether you're entertaining, doing chores, simply unwinding, or just being you, the versatile and simple-to-use CasaTunes product suite enables you to achieve the atmosphere that's right for every occasion. Includes CasaTunes Air, for multiple wireless capabilities. See www.CasaTunes.com/air for a detailed description of CasaTunes Air.

Listen to what you want.

- In the mood for a certain song? Use your browser, smartphone, tablet, or in-wall keypad to search your library – and with a push of a button, you can be humming along with your favorite artist.
- Does the music the rest of your family loves strike a discord with you? Play up to nine different music sources simultaneously – and achieve musical harmony in the family.
- Why wake up to an alarm clock? Program CasaTunes to start your day off right – and not with a jolt – with volume that slowly increases. Then let music sing you to sleep with decreasing volume.

Expand your music collection.

- No need to waste time re-ripping the songs on your iTunes® or Windows® Media Player, CasaTunes works with existing PC- and Mac-based music collections.
- Catch new releases or old favorites on Internet radio via Spotify™, Last.fm™, Grooveshark™, SHOUTcast™ and TuneIn™. Or, SiriusXM™ satellite radio, and traditional AM/FM radio via optional tuners.
- Send music on your iPhone, iPod touch, iPad or iTunes on a Mac or PC to any room or group of rooms using CasaTunes Air.
- Dock one or more iPods® on your CasaTunes music server using the cable from Apple – not a proprietary docking station. You can instantly listen to your music, view album cover art, and even play multiple tracks from the same device at the same time.

Invest in an audio system that stands the test of time.

- Because CasaTunes does not lock you into an expensive proprietary system that limits your components to a single vendor, you can integrate it with existing home theaters, receivers, and components (satellite receivers, cable boxes, and tuners).
- Computer-based server technology with open-platform standards enables easy upgrades to next-generation products and future methods of content delivery – so your investment never becomes obsolete.
- Never run out of music storage. CasaTunes enables you to add internal and external storage – easily and affordably.

Because music means something different to everyone, CasaTunes lets you compose the personalized multi-room audio system that gives you music the way you want it. Wireless and wired, providing unparalleled sound quality, CasaTunes is easy-to-use and completely customizable. Doesn't that sound like the perfect solution?

Manage your entire music collection from one intuitive user interface – view what song is playing, turn music on and off, and set up playlists. Optional in-wall keypads provide a convenient way to control music. Select and browse songs from the CasaTunes app on your smartphone or tablet.
